

carrots

- Increases nutrient uptake
- Improves early growth establishment
- Increases marketable yield
- Increases mass per carrot
- Increases return on investment

Kelpak is a natural biostimulant manufactured from the brown kelp *Ecklonia maxima*, found on the west coast of South Africa. Produced using a cold cellular burst extraction method that preserves its delicate compounds, Kelpak significantly improves marketable yield and quality in carrots.

A global leader in seaweed products for over 47 years

kelpak.com

% Yield increase above standard grower practice, South Africa | marketable yield (gram)

Effect of Kelpak on carrot size above control, South Africa | size (gram/carrot)

Recommended application rates:

Spray 2 L/ha: Spray at 4 to 5-leaf stage and repeat application 14 to 21 days later
