

roses

- Reduces transplant shock
- Improved root development
- Improved nutrient uptake
- Increase in foliar growth
- Resistance to abiotic stress
- Longer stems

Kelpak is a natural biostimulant manufactured from the brown kelp *Ecklonia maxima*, found on the west coast of South Africa. Produced using a cold cellular burst extraction method that preserves its delicate compounds, Kelpak significantly improves marketable yield and quality in roses.

A global leader in seaweed products for over 47 years
