

# table grapes

- Improves tolerance to abiotic stress
- Reduces transplant shock in new plantings
- Improves uniformity of berry size
- Increases first pick yield
- Increases #1 bunch yield & total marketable yield
- Certified for use in organic crop production

kelpak

Kelpak is a natural liquid seaweed extract manufactured from the brown kelp *Ecklonia maxima*, found on the west coast of South Africa. Produced using a cold cellular burst extraction method that preserves its delicate compounds, Kelpak significantly improves marketable yield and quality in table grapes.

**A global leader in seaweed products for over 48 years**

## Recommended Kelpak application timing and rates

### 2 - 5 inch shoot length

For better rachis stretching spray at 2 to 5 inch shoot growth.

Repeat 10 to 14 days later

**Rate** 2-3 pts/Ac

### Berry set

For improved berry size spray from berry set 3 to 4 times at 10 to 14 day intervals

**Rate** 3-4 pts/Ac

### Veraison

For excellent brix and uniform color spray at veraison.

**Rate** 3-4 pts/Ac

### 50% color

Repeat 10 to 14 days after veraison

**Rate** 3-4 pts/Ac

Maintain pH below 7

Kelpak can be used together with most agrochemical tank mixes

plant growth in harmony with nature
